Rules for long-range pistol-revolver shooting

- Shooting is done with a pistol or centerfire revolver. Weapons can be with or without optical aids.
- Shooting position is standing (one-handed or two-handed), sitting from a table and a soft stand.
- Shooting targets are metal and reactive: 50m/20cm, 100m/20cm, 150m/30cm, 200m/50cm.
- Course of the competition: 4 targets are shot at different distances. A circular paper target is also placed at 25m for checking. Each shooter has 2 (50m) or 3 minutes to shoot 1 target. 5 bullets are fired at each target.
- Before starting shooting and timing, one shot can be fired at a paper target (without scoring).

- Scoring: Each target is shot with 5 bullets, each hit in the target is 1 point. Points at 50m are multiplied by 1; points at 100m are multiplied by 2; points at 150m are multiplied by 3; points at 200m are multiplied by 4. The sum of points from all distances gives the shooter's final score.
- Everyone competes in the absolute category, and awards are given separately for the pistol and the revolver.
- In the event of a tie, shots at 200m are evaluated. If the result is still a tie, tiebreaker shots are fired at 200m with one bullet each.
